

8 November 1955

MEMORANDUM FOR THE RECORD

SUBJECT: Project AQUATONE

While in New York on Wednesday, 26 October, I called on [redacted] to discuss our contracting arrangements which utilized their services to see if they felt things were proceeding satisfactorily. They expressed complete satisfaction, and I asked [redacted] if he had any questions but he said he had none and wanted to know nothing more than was absolutely essential to do his job. I said in the event of some special emergency if the communication system set up for him was not adequate they could call me and, in any case, I was at all times ready to consider any problems they might have.
